

RX7101

Video Receiver

MJPEG · MPEG-4 Video Decoding

VIVOTEK RX7101 is a network video receiver, allowing you to have your network-based video appliances like network cameras and video servers connected with analog video devices like TV sets, analog monitors, or any other existing analog video switches. RX7101 supports all VIVOTEK's 7000-series network cameras and video servers. With it, you can quickly convert MJPEG or MPEG-4 digital videos into analog signals and easily output them to existing analog systems.

With the Ethernet interface, users can easily get access to the settings of each device through the built-in web server and the configuration in RX7101 will automatically guide you to establish a quick connection at system boot. RX7101 is able to decode real-time one channel of D1 video stream or 4 channels of CIF video streams.
